

## University of Alberta Online and Continuing Education Agrology Courses

The following 5 day senior agrology courses have been approved by the AIA Council and are now offered by the University of Alberta Online and Continuing Education. Each of these courses entails a minimum of 39 hours education and requires a passing mark with the written exam to be eligible for consideration by the AIA registration committee. These courses may be used to make up any course deficiencies noted by the registration or competence committees or may be used to allow a new practice area work. The subjects covered by these senior agrology council approved courses to date are:

- EXERM 4256 – Applied Hydrology
- EXERM 4264 – Land Reclamation Fundamentals
- EXERM 4265 – Applied Vegetative Reclamation
- EXERM 4280 – Wetland Delineation, Classification, and Assessment
- EXERM 4281 – Applied Soil Physics
- EXERM 4282 – Applied Soil Chemistry
- EXERM 4284 – Applied Soil Fertility
- EXERM 4285 – Environmental Site Assessment and Management
- EXERM 4286 – Remediation Technologies
- EXERM 4291 – Applied Hydrogeology in Alberta
- EXERM 4297 – Soil Classification and Mapping
- EXCPE 4290 – Restoring and Creating Wetlands
- EXCPE 4307 – Soil Science Fundamentals
