

## **Environmental Scientist**

**Type: Full-time**

**Location: Edmonton**

**Closing Date: As soon as suitable candidate is found**

**SOLSTICE CANADA CORP.** is an environmental consulting company specializing in soil assessment, remediation, project management, pre-disturbance assessments, and air photo interpretation for the upstream oil and gas industry. Solstice has been growing and currently has approximately 30 employees, consisting of environmental professionals and support staff. Our professionals have backgrounds in soil science, forestry, biology, hydrogeology, GIS, ecology, safety management, and land use planning.

Solstice Canada Corp. offers a fun and flexible team environment. Solstice values people and balanced lives. We offer learning opportunities and commitment to your professional development.

Solstice is seeking a full time Environmental Scientist

**Job Description:** Field vegetation data sample plots, soil survey, data entry and reporting.

### **Duties to potentially include:**

- Remote field work in forested areas
- Northern Alberta Boreal Forest vegetation surveys
- Describe and sample soils according to the Canadian System of Soil Classification
- Draft and prepare technical reports for distribution to clients, regulatory bodies or the public, including the compilation and interpretation of environmental data
- Field data entry
- Potential for remediation or reclamation work, ie. Phase I's and II's, site assessments of potentially contaminated sites, DSA's, direct excavation of contaminated soil, etc.
- Conduct air photo interpretation

### **Job Requirements:**

- Completion of a two (2) year diploma or degree in a natural resource related field, from a recognized post secondary institution
- Demonstrated experience in conducting soil surveys and pre-disturbance site assessments will be an asset
- Eligible for a professional designation
- Valid Class 5 license is required

- ATV/Argo experience an asset
- Safety training such as Standard First Aid and CPR, H2S Alive, Ground Disturbance II, Transportation of Dangerous Goods, Bear Awareness, etc. and asset.
- Good computer skills and proficiency in word processing and spreadsheet applications is a must
- Familiar with Garmen and Trimble GPS units and data collection methods
- Needs to be self-motivated, work well independently when required, and work with little direction, safely
- Ability to communicate effectively orally and in writing
- Flexible team player; ability to work well with all team members, as well as outside clients and vendors

Solstice Canada Corp. is a privately owned company whose philosophy is encompassed in these five core values:

- Enjoy the work and have fun
- Enjoy the people
- Be compensated fairly
- Live a balanced lifestyle
- Work safely

Employees of Solstice are encouraged to submit new ideas and services to the company, and to maintain an active professional development portfolio. They also enjoy unique compensation and benefits packages. Solstice would be pleased to entertain any questions you have regarding the company or position.
